Fuel/Water Separator

Fleet Maintenance

MFD Hy-TRAX

- Modular base eliminates hoses between components and minimizes leakage
- Base-ported filter provides easy element service from the top cap
- ISO particle counts are visually displayed on a TestMate® Contamination Monitor, TCM, providing an easy and clear way to monitor contamination levels

Asset Management Filtration Station® | AMFS

- Provides automatic record-keeping, trending and analysis of the fluid
- Ideal for fleet or multiple equipment asset maintenance
- Dual, staged filters for both water and/or contaminated removal bypass valve allows cart to be used as a transfer cart
- Automatically shuts down when the selected ISO cleanliness is reached

On-Board Diesel Fuel Coalescing Filter | HDP

- Smaller envelope size offers greater flexibility in mounting locations
- Exceeds industry standards for particulate/water removal in ULSD15 and Biodiesel Fuels
- Modular pre-heater, Water-In-Fuel (WIF) sensor and hand priming pump available
- Innovative electrical primer pump and automatic water drain options available

Bulk Diesel Fuel Cart | BDFC

- Low operating cost due to high-efficiency particulate filter protecting the downstream coalescing element
- Ideal fleet solution when equipped with the available nozzle option for seamless, dual-function fuel dispensing and polishing
- Continuous duty motor for safety and durability and 22" frame width for indoor use
