INDUSTRIES
Advanced Fluid Conditioning Solutions®

Asset Management Filtration Station® | AMFS

- Complete tracking of hydraulic fluid conditions by equipment name
- Provides automatic record-keeping, trending and analysis of fluid products
- Ideal for managing multiple equipment assets

Vacuum Dehydrator | SVD01

- Removes 100% of free and over 90% of dissolved water, as well as 100% of free and over 90% of dissolved gases
- Small, compact and easy to operate unit for quick use during service calls or emergencies

Triton Dehydration Station® | Triton-A

- High dewatering rates and particulate removal in one system
- Simple controls
- Reduce fluid recycling cost
- No expensive vacuum pump to service and replace

Kidney Loop Skid | KLS

- Modular base eliminates connections between components and minimizes leakage
- Base-ported filter provides easy element service from the top cap
